NOMENKLATURLISTE der homöopathischen Arzneimittel

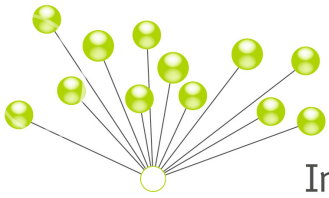

Die Namen der homöopathischen Arzneimittel haben sich seit Samuel Hahnemann immer wieder geändert. International werden die Namen in den Arzneibüchern vereinheitlicht, woraus sich nach wie vor Änderungen ergeben können. In der Homöopathie (wie auch in der Literatur) sind häufig noch die ursprünglichen Bezeichnungen geläufiger. Die Hauptnamen sind jene, die im gültigen homöopathischen Arzneibuch verwendet sowie auf den Etiketten der Arzneimittelverpackung abgedruckt werden.

Hier finden Sie alphabetisch geordnet den aktuell gültigen Hauptnamen sowie, falls vorhanden, die Synonyme und/oder die ursprünglichen Bezeichnungen.

Dieses Verzeichnis stellt keine Auflistung aller in der Homöopathie verwendeten Einzelmittel dar! (Stand: Dezember 2022)
